

City of Everett

2035 Comprehensive Plan Update

Presentation to Snohomish County Public
Utility District

May 6, 2014
Allan Giffen
Planning Director

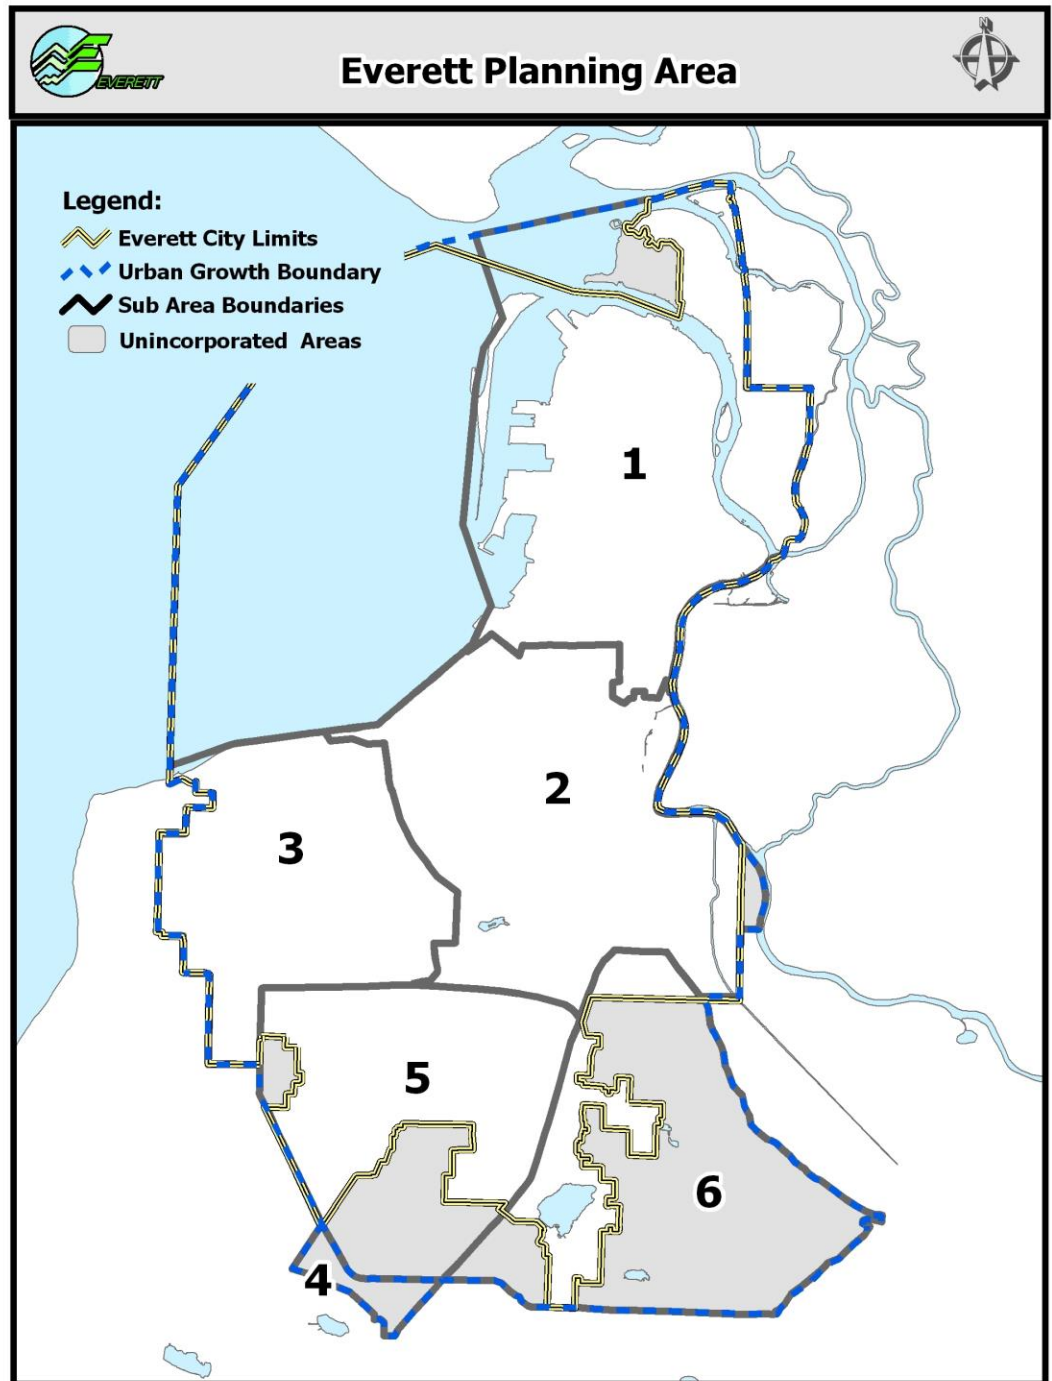

2035 Comprehensive Plan Update

- Extend planning horizon out another 10 years to 2035
- Establish new growth targets
 - Population
 - Housing
 - Jobs
- Land Use / Zoning Changes for larger growth targets

Comprehensive Plan Elements

- Land Use
- Housing
- Transportation
- Utilities / Capital Facilities
- Economic Development
- Urban Design / Historic Preservation
- Parks

Map of Everett Planning Area

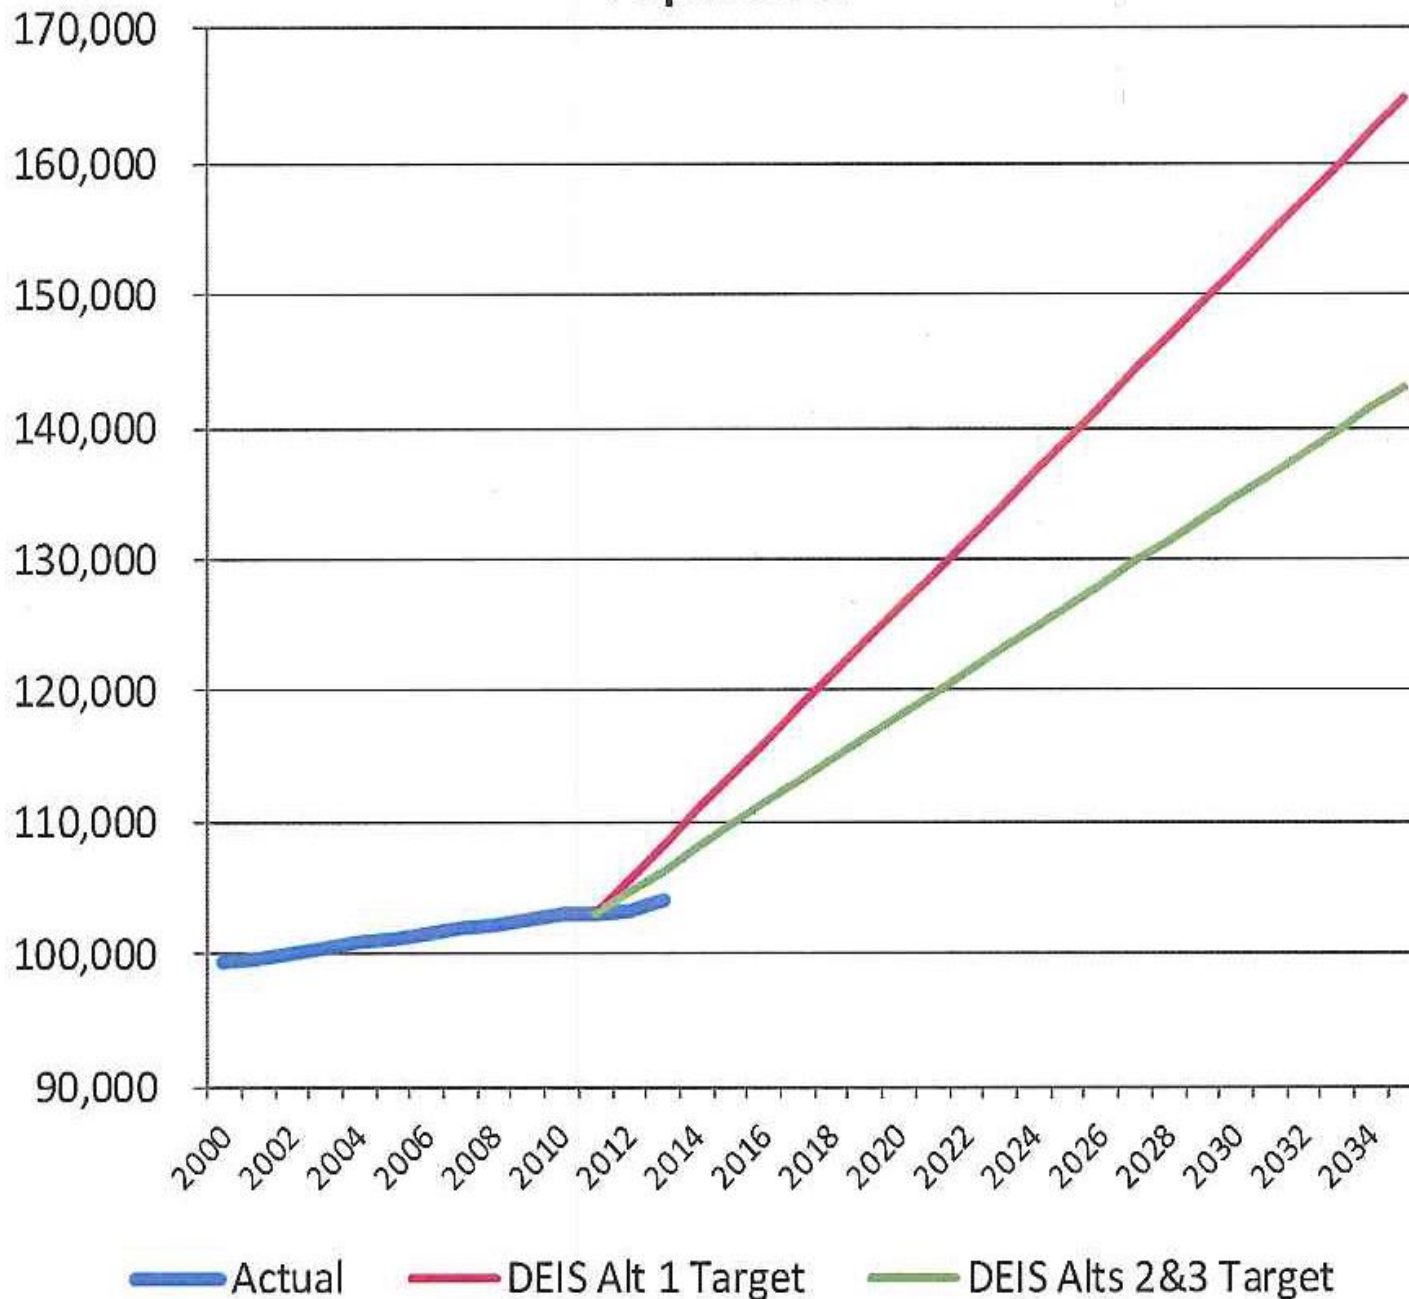

Existing Population and Jobs & Targets for Two Plan Alternatives

	<u>Year</u>	<u>Population</u>	<u>Jobs</u>
	2013	104,000	95,000
Alt. #1	2035	165,000 (+61,000)	145,000 (+50,000)
Alt. #2	2035	143,000 (+39,000)	140,000 (+45,000)

(based on current city limits)

Population

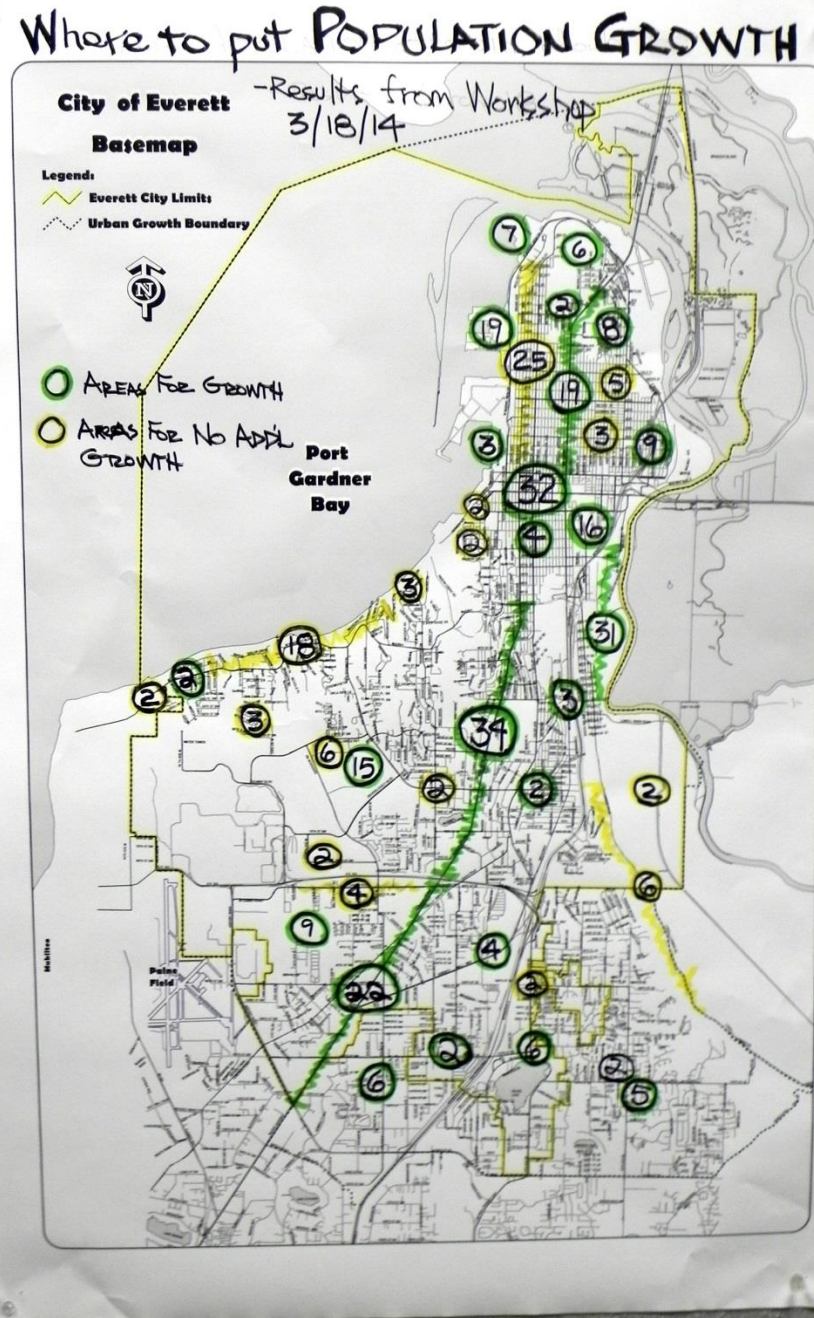

Actual
Average
Annual
Population
Increase
2000-12 =
371 / year

Alt. 1 =
2,755 / yr.

Alt. 2 =
1,764 / yr.

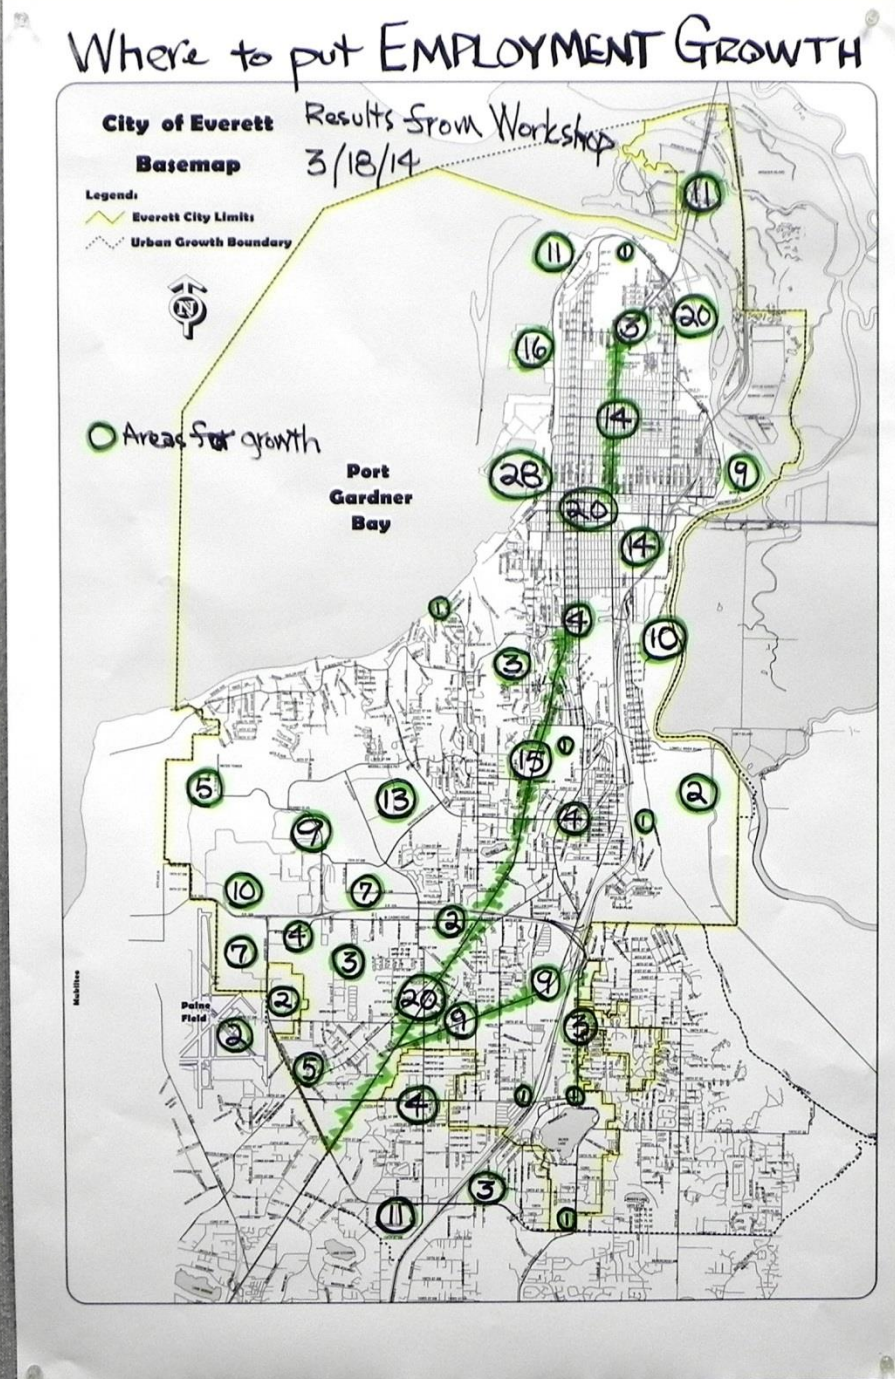

Where to Put More Population

- Downtown
- Evergreen Way
- N. Broadway
- N. Marina
- Riverfront
- Everett Station
- Future light rail stations
- Not in single family neighborhoods

Where to Put More Employment

- Port
- Downtown
- SW Everett
- Evergreen Way
- Waterfront
- Riverfront
- N. Broadway
- Riverside Bus. Park
- Everett Station
- Smith Island
- Everett Mall Way

Other Planning Issues for City

- Aging population
- Changing household characteristics
- Increasing demographic diversity
- Lower household incomes in Everett
- Millennial generation
- Transportation costs
- Timing, alignment and station locations for light rail in Everett

Older Populations

- Proportion of 65+ in Snohomish Co. to double to 21%
- More demand for housing in urban/central locations
- Less demand for single family detached housing
- More dependent on transit and walking
- Drive less
- Lower percentage of car ownership

Trends suggest need for more multi-family housing near transit service

Need additional special needs housing

Changes in household characteristics

- Single person households have doubled since 1970
- Households with children under 18 dropped from 50% to 30%
- Average household size has decreased in County
- Household size has remained constant in Everett (2.38 persons per household)

Trends suggest greater need for smaller dwellings

Increasing diversity

- Percentage of non-white citizens has increased
 - 1990 = 8%
 - 2000 = 19%
 - 2010 = 25%
- Percentage of Hispanic citizens has increased
 - 1990 = 3%
 - 2000 = 7%
 - 2010 = 14%

2010 Median Household Income

- Everett median HH income = \$46,257
- Snohomish County median HH income = \$68,338

Trends suggest need for affordable housing types and affordable transportation choices in Everett

Millennial Generation (Born 1982 to 1995)

- Largest generation in America (80 million)
- Larger than Baby Boom generation (76 million)
- Large college debt
- Prefer urban lifestyles
- Drive less
- Get married later, have children later

Trends suggest need for more affordable multi-family housing in cities with good transit service

Can Everett Reach Growth Targets?

- 61,000 population will require 33,000 housing units
- How much land required for 33,000 units?
- Library Place built at 150 units per acre
- $33,000 / 150 = 220$ acres zoned for high density
- Everett has only 78 acres of vacant residential land
- Half of this is zoned single family

Conclusion – growth targets only possible through intensive redevelopment of already developed properties

Light Rail to Everett

To reach Everett by 2035?

- Light rail will reach Lynnwood in ST Phase 2 by 2023
- Legislature must increase ST tax authority
- Successful ST Phase 3 vote in 2016 or 2020?
- Light rail alignment – to Boeing or up I-5?
- Station locations in Everett
 - How many?
 - Where?

Next Steps

- Changes to increase housing capacity in residential / mixed use areas of the city
- Housing types and affordability
- Transportation system
- Light rail alignment and station locations
- Character / quality of new development
- Capital facilities / financial capacity to provide services and facilities for additional growth
- Zoning and development regulation changes

Planning Issues for PUD

- Growth targets and electrical supply / capacity
- Substation locations near growth areas
- Site development standards and utility requirements
- Security and safety of PUD facilities
- Climate change and sustainability
- New building standards
- Coordination with cities and County

Schedule

- Comp Plan must be adopted by June 30, 2015
- Questions?
